

Energy & Resource Efficiency through technology

Prepared for : India Japan Environment Week
12th-13th Janaury 2023, New Delhi

Industry Challenges

1

Under/Over/Idle Running

2

High Energy Costs/Asset
management Costs

3

Vendor Compliances

4

Brand Image

5

PF/Demand/Power Quality
penalty

6

Non-compliances to
ISO50001

7

Incapability for Losses
Identification and analytics

8

Lack of Data availability for Energy
and Resources

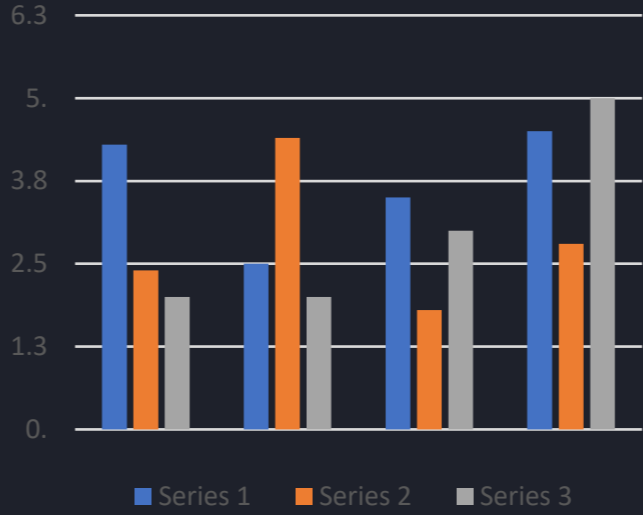

Road to Energy Conservation: The Enerlly Way

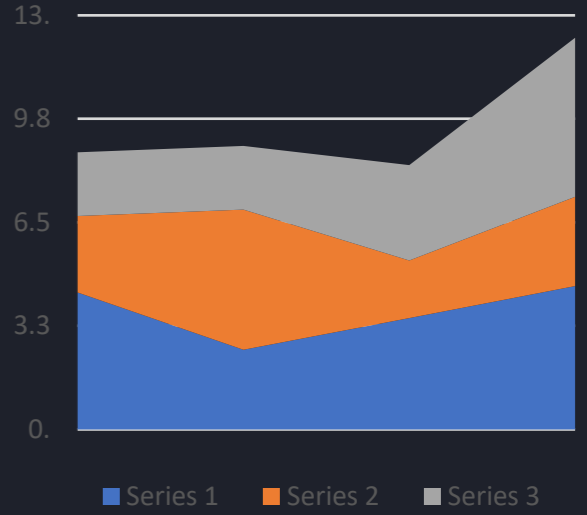

Analytics with Team Enerlly

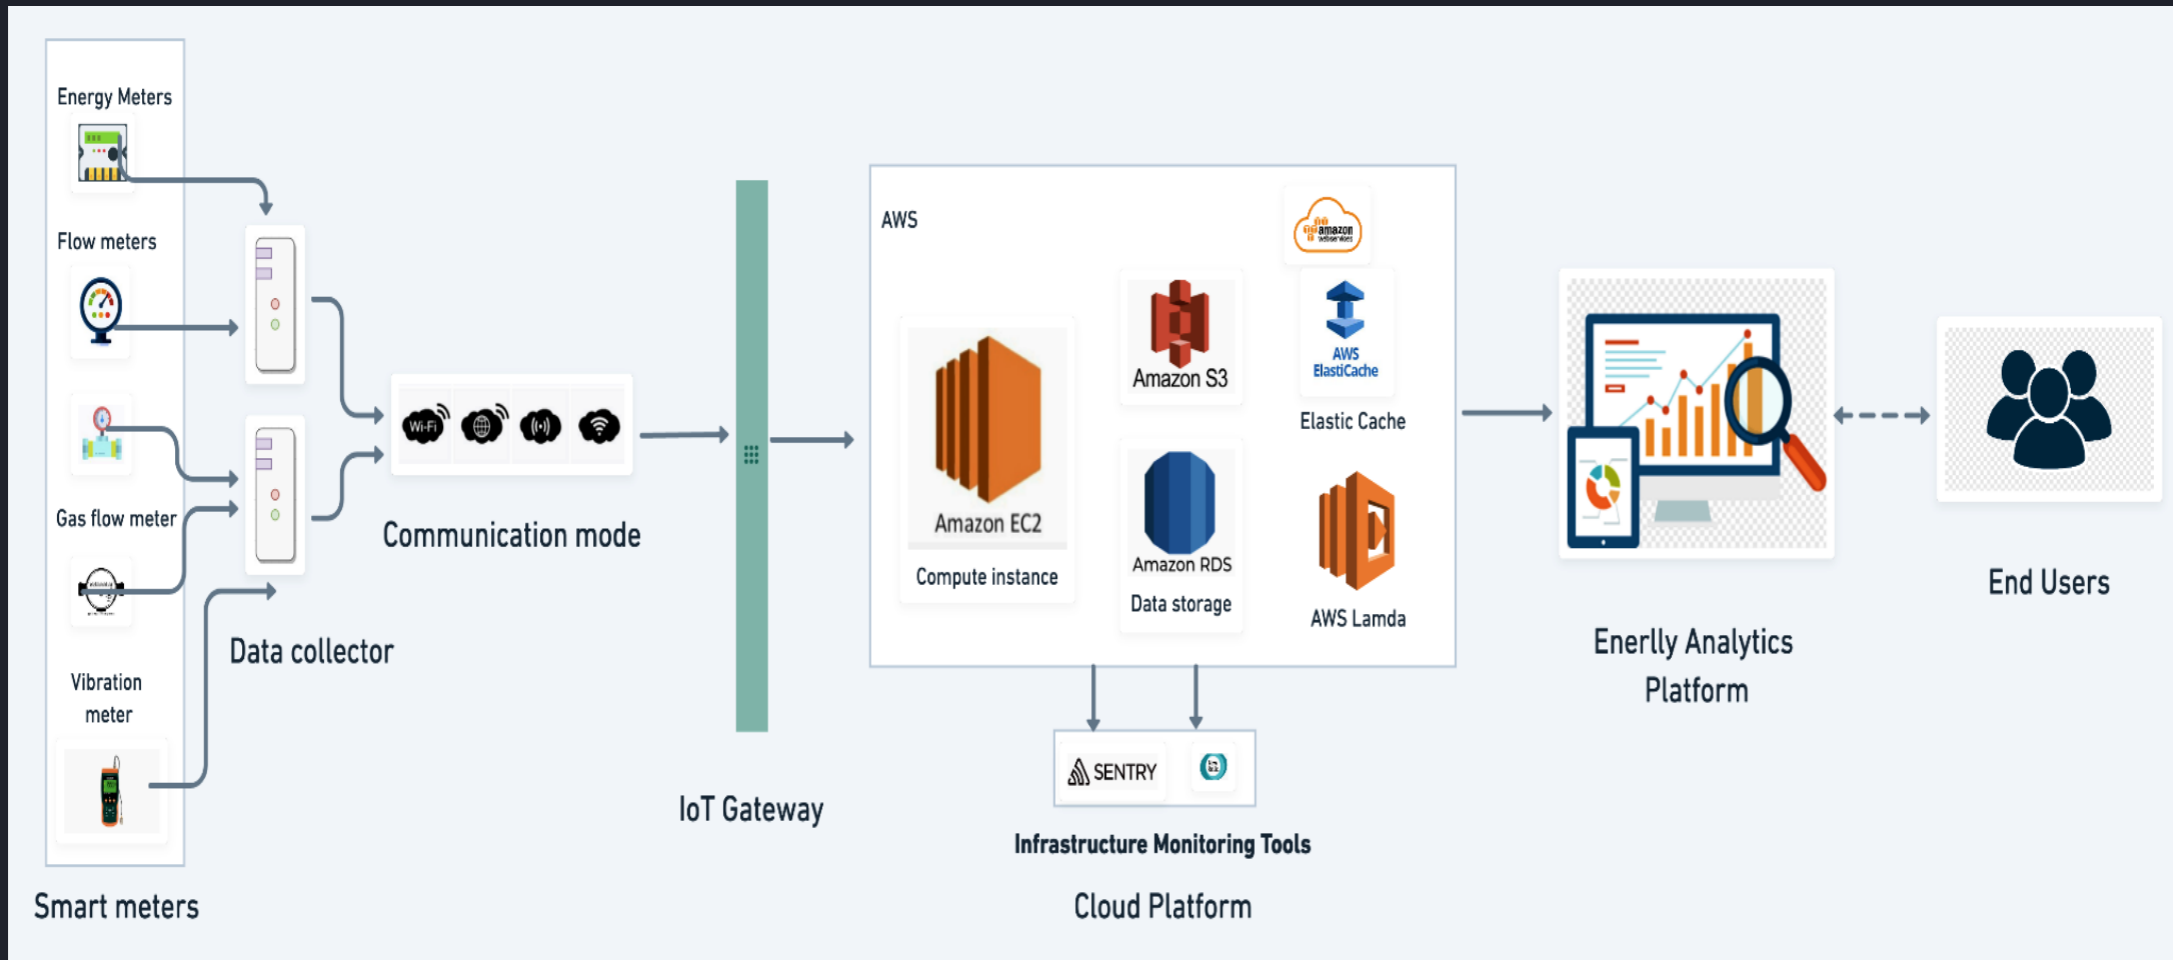

Present scenario:
Scattered, unorganized data

Future scenario:
Action oriented analytical data →

Architecture- How we do it → We take Industries online !

Presently serving:

Foundry | Forging | Aluminium | Automobile | Rubber | Polymer | Machine shops | Oil & Gas | OEMs | Chemical | Pharma | Rolling | Food | Pump |

Thank You!
